Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

I, Douglas H. Anderson, do hereby declare and say:

My home address is 18427 Olympic View Dr., Edmonds, WA 98020.

On November 16, 2001 I signed a declaration stating that I believe that I am an original and joint inventor of the subject matter that is claimed in U.S. Patent Application No. 09/989,808, entitled, "Automatic Generation Of Application Program Interfaces, Source Code, Interrupts, And Datasheets For Microcontroller Programming"

(hereinafter, the present Patent Application). The present Patent Application was filed in the United States Patent and Trademark Office on November 19, 2001. The declaration stating that I believe that I am an original and joint inventor of the subject matter claimed in the present Patent Application was filed in the United States Patent and Trademark Office, along with the present Patent Application.

I have studied the entire specification, drawings, and claims of the present Patent Application. I understand the language of the claims and the scope thereof. I understand the invention as claimed.

As an employee of Cypress Microsystems, a subsidiary of Cypress Semiconductor, subject matter that I originate may be incorporated into Cypress documents, some of which may become public.

I have reviewed Revision 1.0 of the document "PSoC Designer: Integrated Development Environment: Getting Started 12-Minute Tutorial" (hereinafter, IDE Tutorial). It is my belief that, to the extent that subject matter exists in the document "IDE Tutorial" that may anticipate claims of the present Patent Application, such information was derived from the work of myself and my co-inventors of the present Patent Application: Manfred Bartz, Marat Zhaksilikov, Steve Roe, Kenneth Y. Ogami, and Matthew A. Pleis.

I have reviewed "PSoCTM Technology Completely Changes 8-Bit MCU System Design!" (hereinafter, PSoCTM Technology). It is my belief that, to the extent that subject matter exists in the document "PSoCTM Technology" that may anticipate claims of the present Patent Application, such information was derived from the work of myself and my co-inventors of the present Patent Application: Manfred Bartz, Marat Zhaksilikov, Steve Roe, Kenneth Y. Ogami, and Matthew A. Pleis.

I further declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

Respectfully submitted,

Date: 07/07, 2005

Dear Sir:

I, Manfred Bartz, do hereby declare and say:

My home address is 10303 172nd Ave., SE, Snohomish, WA 98290.

On November 16, 2001 I signed a declaration stating that I believe that I am an original and joint inventor of the subject matter that is claimed in U.S. Patent Application No. 09/989,808, entitled, "Automatic Generation Of Application Program Interfaces, Source Code, Interrupts, And Datasheets For Microcontroller

Programming” (hereinafter, the present Patent Application). The present Patent Application was filed in the United States Patent and Trademark Office on November 19, 2001. The declaration stating that I believe that I am an original and joint inventor of the subject matter claimed in the present Patent Application was filed in the United States Patent and Trademark Office, along with the present Patent Application.

I have studied the entire specification, drawings, and claims of the present Patent Application. I understand the language of the claims and the scope thereof. I understand the invention as claimed.

When I was an employee of Cypress Microsystems, a subsidiary of Cypress Semiconductor, subject matter that I originated was subject to be incorporated into Cypress documents, some of which may have become public.

I have reviewed Revision 1.0 of the document “PSoC Designer: Integrated Development Environment: Getting Started 12-Minute Tutorial” (hereinafter, IDE Tutorial). It is my belief that, to the extent that subject matter exists in the document “IDE Tutorial” that may anticipate claims of the present Patent Application, such information was derived from the work of myself and my co-inventors of the present Patent Application: Matthew A. Pleis, Marat Zhaksilikov, Steve Roe, Kenneth Y. Ogami, and Douglas H. Anderson.

I have reviewed "PSoC™ Technology Completely Changes 8-Bit MCU System Design!" (hereinafter, PSoC™ Technology). It is my belief that, to the extent that subject matter exists in the document "PSoC™ Technology" that may anticipate claims of the present Patent Application, such information was derived from the work of myself and my co-inventors of the present Patent Application: Matthew A. Pleis, Marat Zhaksilikov, Steve Roe, Kenneth Y. Ogami, and Douglas H. Anderson.

I further declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

Dear Sir:

I, Steve Roe, do hereby declare and say:

My home address is 18208 NE 194th St., Woodinville, WA 90872.

On November 16, 2001 I signed a declaration stating that I believe that I am an original and joint inventor of the subject matter that is claimed in U.S. Patent Application No. 09/989,808, entitled, "Automatic Generation Of Application Program Interfaces, Source Code, Interrupts, And Datasheets For Microcontroller Programming"

(hereinafter, the present Patent Application). The present Patent Application was filed in the United States Patent and Trademark Office on November 19, 2001. The declaration stating that I believe that I am an original and joint inventor of the subject matter claimed in the present Patent Application was filed in the United States Patent and Trademark Office, along with the present Patent Application.

I have studied the entire specification, drawings, and claims of the present Patent Application. I understand the language of the claims and the scope thereof. I understand the invention as claimed.

As an employee of Cypress Microsystems, a subsidiary of Cypress Semiconductor, subject matter that I originate may be incorporated into Cypress documents, some of which may become public.

I have reviewed Revision 1.0 of the document "PSoC Designer: Integrated Development Environment: Getting Started 12-Minute Tutorial" (hereinafter, IDE Tutorial). It is my belief that, to the extent that subject matter exists in the document "IDE Tutorial" that may anticipate claims of the present Patent Application, such information was derived from the work of myself and my co-inventors of the present Patent Application: Manfred Bartz, Marat Zhaksilikov, Kenneth Y. Ogami, Matthew A. Pleis, and Douglas H. Anderson.

I have reviewed "PSoC™ Technology Completely Changes 8-Bit MCU System Design!" (hereinafter, PSoC™ Technology). It is my belief that, to the extent that subject matter exists in the document "PSoC™ Technology" that may anticipate claims of the present Patent Application, such information was derived from the work of myself and my co-inventors of the present Patent Application: Manfred Bartz, Marat Zhaksilikov, Kenneth Y. Ogami, Matthew A. Pleis, and Douglas H. Anderson.

I further declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
